SUMMARY

Highly motivated Full-Stack Developer with more than 2 years of experience building user-friendly interfaces and robust backends. Proficient in React.js, Next.js, jQuery, React Redux for frontend development and Django, Django REST Framework for backend development. Experienced with various databases. Eager to contribute to a team environment and leverage my skills to build innovative web applications.

WORK EXPERIENCE

Contract Developer

Desert Marketing   Mar 2023 - Oct 2023

- Designed and developed user interfaces for marketing campaigns using React.js and Next.js.
- Implemented interactive features and functionalities using React Redux for state management.
- Collaborated with designers and back-end developers to ensure seamless integration.
- Translated Figma designs into fully functional frontend components, ensuring accurate representation of the original design.

PROJECTS

Dryrobe

https://dryrobe.web.app/   Mar 2024 - Mar 2024

- E-commerce website built from scratch using React.js and Redux for the frontend and Django with Django REST Framework for the backend.
- Implemented product sorting, variant selection (size, color), and a shopping cart with quantity management using React Redux for state management.
- Integrated Razorpay payment gateway to enable secure online payments via credit cards, debit cards, net banking, and popular wallets.

Challenges Overcome:

- **Dynamic Product Image Update:** Ensured product image reflects the selected color variant upon user click, requiring efficient image loading and state management with Redux.
- **Cart Optimization:** Implemented logic to identify existing cart items with the same color and size, triggering quantity updates instead of duplicate entries. This streamlines the user experience and prevents cart errors.
- **Coupon Functionality:** Developed a system for integrating product-specific coupons, allowing store owners to offer targeted discounts. This involved handling coupon codes, validation, and price adjustments on the backend and frontend.

PROJECTS

PostLabelled

https://postlabelled.web.app/   Dec 2023 - Dec 2023

- E-commerce website designed for small businesses, built with React.js for the frontend and Redux for state management.
- Implemented product selection by size, cart updates for existing items (prevents duplicate entries), and a shopping cart with quantity management.
- Integrated Razorpay payment gateway to enable secure online payments via credit cards, debit cards, net banking, and popular wallets.
- Utilized Framer Motion for creating various animations, enhancing user experience and engagement.
- Incorporated coupon functionality for targeted product discounts by store owners.
