I possess a Master's degree in Computer Applications (MCA) and have accumulated over a decade of experience in diverse technical positions within the software industry. Throughout my career, I have primarily focused on developing web and digital user interface applications for a range of domains including Online-Education, FMCG, E-Commerce, Healthcare, and the Gas industry.

EXPERIENCE

Organization: **HCL Technologies**, Bengaluru. (3rd)

Period: January 2021 – Till Date.

Designation: Technical Lead – User Interface Development

Client: Cadent Gas Ltd & Roche.

- ➢ Fostering a team culture of excellence by mentoring junior members, sharing knowledge, and providing constructive feedback to facilitate their growth.

- ➢ Offering technical expertise throughout the entire project lifecycle, including concept development, solution design, implementation, optimization, and support.

- ➢ Collaborating closely with Product Managers and Development teams to ensure the feasibility of design specifications, tracking changes, and making necessary adjustments.

- ➢ Taking responsibility for preparing technical designs of components to ensure the security, reliability, scalability, and user-friendliness of websites and web applications.

- ➢ Designing, developing, and maintaining websites and web applications that align with the organization's and clients' needs and expectations, while actively engaging with them to define architectural requirements.

- ➢ Demonstrating expertise in debugging and resolving issues related to cross-browser compatibility, cross-device functionality, and platform compatibility.

- ➢ Monitoring and ensuring optimized performance, SEO, accessibility, and adherence to security standards.

- ➢ Effectively communicating and discussing design alternatives with stakeholders on a regular basis throughout the project lifecycle.

Organization: **Mindtree Ltd**. / **CBSI India Pvt**. **Ltd**., Chennai. (2nd)

Period: February 2015 - January 2021.

Designation: Senior Software Engineer

Client: P&G (Proctor & Gamble).

Organization: **Hurix Systems Pvt**. **Ltd**., Chennai. (1st)

Period: July 2013 – October 2014.

Designation: Media Developer

Client: HMH (Houghton Mifflin Harcourt).

BUSINESS SKILLS

➢ Proficient in problem-solving and adept at effectively communicating complex technical subjects or tasks.

➢ Skilled in developing scalable and resilient distributed systems within specified timeframes.

➢ Extensive investigation into how existing technologies address customer issues from both technological and business standpoints.

LEADERSHIP SKILLS

➢ Displays a clear thought process to navigate through incomplete information and ambiguous problem definitions.

➢ Exerts influence on others by garnering both overt and covert support for ideas, while also sharing knowledge, authority, and recognition, thereby fostering trust, credibility, and positive relationships.

➢ Takes the initiative to identify and eliminate project obstacles or hindrances on behalf of the team.

TECHNICAL SKILLS

➢ Highly skilled in managing the entire lifecycle of web projects, starting from Project Initiation, Planning, Team formation, Document gathering, Designing, Development, Testing, and delivering to the client.

➢ Possess expertise in frontend technologies with over 10 years of practical experience in HTML5, CSS3, and JavaScript implementation to develop responsive and adaptive user interface applications.

➢ Proficient in styling components like CSS, CSS3, and preprocessors such as sass & less.

➢ Knowledgeable in Content Management Systems like Sitecore, Kentico, and WordPress.

➢ Have an intermediate level of proficiency in JavaScript frameworks like AngularJS and Angular.

➢ Skilled in user experience design, including creating and maintaining digital assets, interface design files, wireframes, and interactive mockups using Figma & Photoshop.

➢ Occasionally involved in writing automated tests such as unit, functional, A/B, end-to-end, and visual regression tests.

➢ Basic understanding / beginner in AJAX, XML, JSON, NodeJS, and SQL Server, Python.

➢ Experience in Agile software development and proficiency in management tools like Jira, Service Now, and Confluence.

➢ Contribute to DevOps setup within the team, developing CI/CD pipelines, and overseeing deployments, utilizing code versioning tools like Git, Bitbucket, SVN, etc.

➢ Basic understanding of cloud technologies like Jenkins & AWS.

➢ Intermediate experience in Accessibility, SEO, and Web Analytics using various online tools.

➢ Strong understanding of UI principles, system and application design, coding standards, best practices, system performance, and availability.

➢ Comprehensive knowledge of web application stack and the interconnection of all components from the database, server software, API implementation to single page JavaScript applications.

➢ Familiarity with general software engineering practices, backend processing systems, system integration, and more.
